

Dr. Dietrich Müller GmbH, Zeppelinring 18, D-26197 Ahlhorn

Thermally Conductive Products

Thermiflex[®] TF 21132

Characteristics: Thermiflex[®] TF 21132 has a high dielectric breakdown voltage of >4,000 volts ac. It is fibreglass-reinforced and resistant to tears and punctures. It is coated on both sides with self-adhesive.

Application: Thermiflex[®] TF 21132 is used for Electrical power generators, switching mode power supplier, signal amplifiers and AC/DC-DC Power converters.

Colour: Thermiflex[®] TF 21132 is available in grey as standard.

Form of Supply: Thermiflex[®] TF 21132 is supplied in standard rolls: width: 300 mm, length: 50m. Custom Die-cut parts are also available.

Stand November 2014

Please note:

The information in this data sheet is based on our current knowledge and experience. They do not disengage the fabricator and user from own tests and inspections because of the plenty of possible effects. There is no judicial binding assurance of certain properties or of the qualification for a concrete application in our declaration. We recommend consulting us in individual cases. The acceptor of our products has to observe possible industrial property rights as well as present laws by himself.
