

Dr. Müller GmbH is proud of the commissioning of the Germany's first offshore wind park

Alpha Ventus was set into commercial operation

(News4Press.com) The German Federal Minister for Environment Dr. Norbert Röttgen has officially opened the Germany's first offshore wind park, Alpha Ventus, situated in the Exclusive Economic Zone (EEZ), in the North Sea 45 km north of the island of Borkum.

The company Dr. Müller GmbH stresses the importance of this innovative wind park located in Germany, which has been installed with twelve wind turbines of five megawatt capacity each and which aims to produce energy that will meet the consumption requirement of approximately 50,000 households per year.

The commissioning of Alpha Ventus is a step forward not only for the development of offshore wind power technology but also for the research of new projects related to this area and with the nature conservation.

Dr. Müller GmbH, Ahlhorn (Lower Saxony/ Germany) has been a leading supplier of parts made of Nomex®, Mylar®, and Thermiflex® to be used in the generators and electronic devices for this pioneer project. For this reason the company is very proud for the success of this project for this environmentally generation power undertaken by a consortium of EWE, EON and Vattenfall Europe.

About Dr. Müller GmbH

Dr. Müller GmbH has proven itself as successful service partner for industrial manufacturers since 1967.

The company supplies highly quality components and insulation systems for solar and wind generation industries as well as for the electrical and electronic companies. A variety of small and middle trade repair businesses as well as renewable energy industries trust in our products and the implementation of our technical solutions.
