

Dr. Mueller and Temac: Distribution agreement on industrial gaskets

NewsreleaseDate: 2010-04-16

The company Dr. Müller GmbH based in Ahlhorn / Lower Saxony and Temac, located in Zverinek / Czech Republic have signed a distribution agreement on the products manufactured by Temac for the German market.

Temac's product portfolio includes a wide range of industrial gaskets, mainly fibrous-rubber sealing boards, boards and die-cut sealing from an expanded graphite and PTFE, a wide range of combined gaskets such as spiral wound gaskets, camprofiles, special metal-sealing elements, gland packings, graphite rings, PTFE products, static packings and textiles, non-asbestos gaskets materials and other metallic components.

„By signing this distribution agreement we have managed to allow the distribution in Germany of a wide range of quality sealing materials of this leading European manufacturer," said Frank Funke, sales manager of Dr. Müller GmbH

At the beginning, Dr. Mueller will focus on the range of non-asbestos gaskets materials of this Czech company. The firm will concentrate its activities on the selected dealers and the cutting companies.

"The advantage of Temac's materials is that they have a large number of certifications," said Daniel Moc, Temac's sales manager. For example, DVGW (gas), KTW (drinking water) and BAM (oxygen) certifications.

World renowned companies use products from Temac:

As an example from the petrochemical field, companies such as Shell, Esso and Bayer could be mentioned, from the automotive industry, Volkswagen subsidiary Skoda as well as the French suppliers Valeo and Faurecia.

About Dr. Müller GmbH:

The Dr. Müller GmbH in Ahlhorn (Niedersachsen) is one of the world's largest supplier of Electrical Insulating Materials, Thermally Conductive Products, gaskets and Technical Films since 1967.
