

tapes

Tesa® 50525

Material: tesa® 50525 is a flexible aluminum tape with an acrylic adhesive.

Properties: tesa® 50525 offers good adhesion strength and moisture resistance. It has high thermal conductivity and is very age resistant.

Applications: tesa® 50525 is used for assembly of cooling coils, insulation of pipes, universal thermal insulation or for covering, protection, repair, closing, etc.

Colour: silver

Property	Unit	Value
Base material		Aluminum
Thickness	µm	60
Adhesive		Acrylic
Adhesion to steel	N/cm	5
Elongation at break	%	5
Tear strength	N/cm	23
Temperature resistance min.	°C	-40
Temperature resistance max.	°C	160
Surface quality		reflective

Please note:

The information in this data sheet is based on our current knowledge and experience. They do not disengage the fabricator and the user from own tests and inspections because of the plenty of possible effects. There is no judicial binding assurance of certain properties or of the qualification for a concrete application in our declaration. We recommend consulting us in individual cases. The acceptor of our products has to observe possible industrial property rights as well as present laws by himself.
